

FINISHED PhD THESES
Academic Year 2017

| A/A | SURNAME/NAME | THESIS TITLE | SUPERVISOR |
|------------|----------------------------|--|-------------------|
| 1 | GEORGIS GEORGIOS | Parallel processes and applications in image and video processing | D. Reisis |
| 2 | MASTROGIANNIS DIMITRIOS | Experimental investigation of the emission mechanisms of acoustic and electromagnetic signals from crystalline materials under conditions of uniaxial compression until fracture | V. Hatjicontis |
| 3 | KOURNIOTIS MICHALIS | Properties of massive stars in the local group | D. Hatzidimitriou |
| 4 | PAOURIS EVANGELOS | Space weather monitoring: modulation of cosmic ray intensity due to large interplanetary coronal mass ejection | H. Mavromichalaki |
